

# PHOTO PROCESSING SINKS

## MADE TO YOUR SPECIFICATIONS

There is no need to be bound to "Standard" sink sizes with **Arkay**. Our expert design team and skilled craftspeople have designed and manufactured sinks for hospitals, schools, pathology labs, U.S. ships, graphic arts and other photo and specialized lab facilities for years. All of our stainless steel sinks are made from type 316LC (low carbon) photographic

quality stainless steel. This stainless steel will ensure years of corrosion-free service. If you have a unique or special application sink requirement, call **Arkay** first and talk with our helpful design team. ALL SINKS CAN BE MODIFIED TO COMPLY WITH ADA REGULATIONS and generally at no additional cost.

## ARKAY'S PREMIUM SINKS – SERIES S AND SP RADIUS COVERED CORNERS

Arkay's best is the industry's best. The Series S and SP premium sinks are made using 18 gauge Type 316 LC stainless steel as standard, making them thicker, more rugged and longer lasting than the competition's standard gauge sinks. If heavier gauge is required, 16 or 14 gauge is available. Each sink is painstakingly crafted to your exact specifications using this low carbon, highly rigid stainless steel. The S and SP style sinks are 100% seamless construction. The inside corners of these sinks have 3/4" radius covered corners leaving dirt no place to hide. The tapered look is extended to the outside of the sink, where you'll find 1-1/2" wide rims and 1-1/2" radius outside corners. The self-supporting sink stand also has that rounded and polished look of craftsmanship and quality.

Arkay stainless steel premium sinks offer unequalled design and craftsmanship to last a lifetime.

## ACCESSORIES AND OPTIONS FOR ALL PREMIUM AND STANDARD SINKS

### SINK STAND

The sink stand and storage shelf is available in either black vinyl-clad steel or stainless steel. The sink stand can be modified to comply with ADA wheelchair access requirements. Also available in high pressure laminated wood.

### VENTING

Where venting is required, we can install integral venting ports in the backsplash with a pipe or duct starter collar for hook-up to the building venting system.

### DRAIN LOCATION

All sinks are manufactured with the drain in the right rear corner. Drains can be relocated on request.

### OPTIONS

- Stainless steel duckboard
- PVC sink mat
- Left and right drain/squeegee boards
- Side splash
- Welded partitions with drain
- Undersink storage cabinet in steel, stainless or high pressure laminated wood

### COUNTER-TOP INSTALLATION

To install as a counter top, order the sink with hemmed-under lips and anchor bolts. Sink bottom must be supported by you.

### RECIRCULATION ADAPTION

Arkay will punch four holes in the sink bottom (one in each corner). Order attachment kit Model AK-S/1 for XR-100 or 4007A Recirculation System.

Available with 6" deep sinks only.

Premium stainless steel sink with optional stainless steel cabinet and PP3 plumbing package.

SP – Add 3" to length and 6-1/2" to width (front to back).

Standard SQP stainless steel sink with optional stand, shelf and standpipe

## ARKAY'S STANDARD SINKS

### SERIES SQ AND SQP, SQUARE CORNERS

Just like our premium sinks, the SQ and SQP series are constructed of 18 gauge Type 316 LC stainless steel. Our standard sinks are heliarc welded into one solid piece, then ground, polished and passivated to provide the ideal protective surface for photographic chemicals. All **Arkay** standard sinks are lifetime undercoated for sound insulation and condensation prevention. The SQ and SQP series sinks are easy to clean, durable, quiet and condensation-free. Compare our 18 gauge stainless steel standard sinks with any on the market, and we are confident you will discover the **Arkay** difference.

The sink's 38" high self-supporting stand and storage shelf is available in either stainless steel or black heavy gauge vinyl clad steel and can be modified to meet ADA requirements upon request at no additional charge. **Arkay** also offers three models of factory installed water temperature control plumbing packages. Special custom size sinks and configurations are available to meet your specific requirements. Call us with your specifications.

## DUCKBOARDS

Available in Type 316 LC stainless flat top channels. Sized to sink (please specify when ordering). A PVC sink mat is also available.

Stainless Duckboard

PVC Sink Mat

## DIMPLED BOTTOM OF SINK

(not shown) The "KING" of duckboards ... a multitude of permanently raised 3/4" diameter dimples, evenly spaced, installed in the sink bottom to raise processing vessel off the bottom of the sink by 3/16" for free water flow and drainage.

# FIBERGLASS PHOTO PROCESSING SINKS

The most advanced hi-tech design materials and fabrication techniques are employed in the construction of every **Arkay** fiberglass sink to ensure integrity and long life. Each **Arkay** sink is made to exact specifications. Each molded, reinforced composite sink is gel coated with a high gloss isophthalic neo pentyl glycol gel coat to ensure years of maintenance-free use. The 1/8" structural laminate consists of 60% orthophthalic polyester resin matrix, formulated for tough impact-resistant use, and 40% fiberglass type "E" treated with a silane finish for resin compatibility.

## FEATURES:

- 6" or 10" deep sinks available
- Rounded inside and outside corners for ease in cleaning
- Backsplash is 7" high and 5" deep to conceal optional plumbing package connections
- Molded duckboard bottom
- Includes a 1-1/2" stainless steel drain fixture
- Includes a 38" high, heavy gauge black vinyl clad steel stand and storage shelf
- Available with optional factory installed water temperature controlled plumbing package
- Sink stand is shipped knocked down for easy movement through narrow doorways
- Sink stand can be modified for ADA wheelchair access

 Available with 6" deep sinks only

## ARKAY FACTORY INSTALLED PLUMBING PACKAGES FOR PREMIUM/STANDARD STAINLESS STEEL AND FIBERGLASS SINKS

Choose any style stainless steel or fiberglass sink and **Arkay** will install the plumbing package ideally suited to your professional needs. We use only the highest quality chrome-plated fixtures.

**Arkay's** factory installed plumbing packages conceal all plumbing connections behind the backsplash, allowing installation against the wall. **Arkay** also offers optional recirculation adaption kits. We will punch four holes in the bottom of the sink and furnish a Model AK-S/I attachment kit for **Arkay** recirculation systems (4007-A or XR-100).

### PP1 Package – 36" and longer

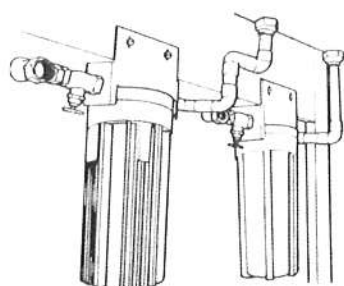

- 1 – dial thermometer
- 1 – hydroguard water temperature control valve with checkstops
- 1 – sink tempered water inlet control valve and jet
- 1 – K-100VB faucet with 1/2" vacuum breaker (for sink inlets) and 3/4" garden hose connections
- 1 – standpipe (removable)
- 1 – vacuum breaker

### PP2 Package – 48" sink length minimum

- 1 – dial thermometer
- 1 – hydroguard water temperature control valve with checkstops
- 1 – sink tempered water inlet control valve and jet
- 2 – K-100VB faucet with 1/2" vacuum breaker (for sink inlets) and 3/4" garden hose connections
- 1 – standpipe (removable)
- 1 – vacuum breaker

### PP3 Package (shown) – 60" sink length minimum

- 1 – dial thermometer
- 1 – hydroguard water temperature control valve with checkstops
- 1 – sink tempered water inlet control valve and jet
- 2 – K-100VB faucet with 1/2" vacuum breaker (for sink inlets) and 3/4" garden hose connections
- 1 – standpipe (removable)
- 1 – vacuum breaker
- 1 – K200DS hot and cold swing faucet with sprayer for top of sink

## SUPPLY WATER FILTER PACKAGE

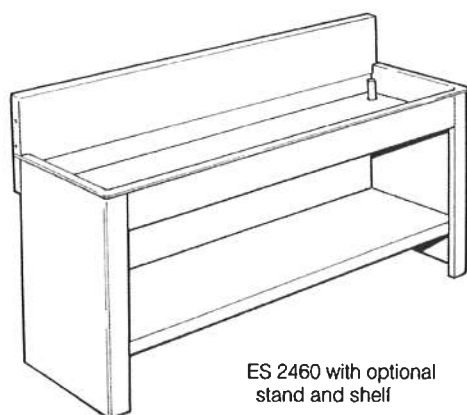

Insure a particle-free water supply and protect your photographic material by adding this factory assembled filter package to your installed plumbing package. The filter package

consists of a hot and cold filter housing, brass shut-off valves, steel mounting brackets, and 4-foot stainless steel wire mesh reinforced flexible hook-up hoses.

**Model FP-10** – Polypropylene housings

**Model FP-10SS** – Stainless steel housings

# ECONOMY PHOTO PROCESSING SINKS

ES 2460 with optional stand and shelf

Affordable economy sinks from **Arkay** represent a remarkable value. Constructed of 20 gauge Type 316 LC stainless steel, our economy sinks are comprised of the highest quality workmanship you expect from **Arkay**. All our economy sinks are heliarc welded, passivated and polished. The gauge is thicker and heavier than other economy sinks and will provide superior temperature holding qualities. **Arkay's** economy sinks are undercoated for sound insulation and condensation prevention. **Arkay's** economy line sinks are available with optional heavy gauge, vinyl-clad, chemical-resistant steel stand and shelf, and deluxe 10" high by 5' wide backsplash that accepts our factory installed plumbing packages. The sink stands can be modified for ADA wheelchair access.

## PLUMBING PACKAGES

### FACTORY INSTALLED IN THE SINK'S BACKSPLASH

#### P1/BS Package – Deluxe Backsplash

1 – 2" dial thermometer  
1 – tempered water mixer  
1 – K-100 faucet  
1 – standpipe

#### P2/BS Package – Deluxe Backsplash,

#### 48" sink length minimum

1 – 2" dial thermometer  
1 – tempered water mixer  
2 – K-100 faucets  
1 – standpipe

Available with 6" deep sinks only

#### P3/BS Package – Deluxe Backsplash,

#### 60" sink length minimum

1 – 2" dial thermometer  
1 – tempered water mixer  
2 – K-100 faucets  
1 – K-200 DS faucet  
1 – standpipe

## AK-S/I RECIRCULATOR ADAPTOR KIT

(Not shown). Model AK-S/I Recirculator Adaptor Kit for **Arkay** 4007A Refrigeration/Heater Recirculator System.

**Arkay** will punch 4 holes in the bottom of the sink pan, one in each corner, and provide all the necessary hardware and flexible hoses for hook-up to the 4007A.

# ARKAY GRAPHIC ARTS PROCESSING SINKS

## TWO-COMPARTMENT TRAY PROCESSING AND WASH SINKS – ARKAY'S EXCLUSIVE DESIGN FOR GRAPHIC ARTS LABS

Arkay helps make your processing a little easier and more controllable with these conveniently designed two compartment sinks constructed from 18 gauge Type 316 LC stainless steel, heliarc welded, passivated and polished. The larger compartment will accommodate three processing trays with room to spare. The wash compartment is oversized for maximum material washing. The full length dump trough is a convenient way to quickly dump exhausted chemicals as well as the overflow wash water from the wash compartment. A 9" high by 5" wide integral backsplash is designed to conceal the plumbing connections of any optional factory installed plumbing package. Includes a black vinyl-clad heavy gauge steel stand and shelf. **Custom sizes are available.**

### OPTIONS:

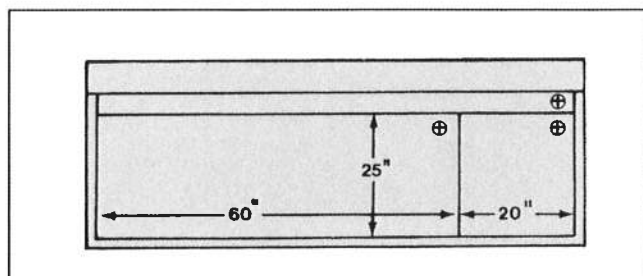

- Stainless steel stand and shelf
- Stainless steel duckboard for tray compartment
- PVC sink mat for tray compartment
- AK-S/1 recirculating adaptor kit
- Factory installed plumbing packages
